

In compliment of the article 17.2 of the 31/1995 of Spanish prevention of labor risks Law, The IBE delivers to the worker:

- IBE espaces Risk evaluation (CMIMA building)
- General CMIMA building risk evaluation (common zones)
- Autoprotection Plan (CMIMA Building)
- Emergency Plan (CMIMA Building)

The referred information is available through IBE intranet https://www.ibe.upf-csic.es/

Furthermore, in each laboratory you can find a copy paper of concrete risks of the room.

The IBE also delivers to the worker the following **material for individual protection (EPI)** that, according to risk evaluation is indicated for the work that he/she will have to perform at his/her research laboratory at IBE:

Protection material	Company	Units
Laboratory labcoat:Protection glasses:Other:	Uvex (VWR international; 89/686/EEC and standard EN 166 (1995)	1 1 0

The worker has been informed on when/where to use perceptively that material and how to use it.

On his/her side, in compliment of article 29 of the cited Law, the worker takes compromise to:

- Use the equipment in the indicated situations and always in areas where it's use is compulsory
- ➤ Use and maintain them following manufacturer's instructions
- Consult any doubt on its use
- > Inform immediately on any defect o damage on the equipment

Delivered by:	I declare that I have received and I understand the documentation indicated in this document.	I declare that I have received The indicated EPI's	
	Received & understood:	Received & understood:	
(IBE Admon.)	The worker: (I.P)	The worker: (I.P)	
Barcelona,			
COMPLETE ONLY IN CASE YOU ARE NOT GOING TO PERFORM ANY LABWORK			
The worker declares that his/her tasks at Institute of evolutionary biology will be purely administrative and will not include laboratory tasks. For this reason the deliver of EPI's is not needed
