

The Institute of Evolutionary Biology seeks a: Lab manager

The Institute of Evolutionary Biology (IBE) is a joint Institute of the Spanish National Research Council (CSIC) and the Pompeu Fabra University (UPF) located in Barcelona city. IBE research is focused on the processes and mechanisms that generate biodiversity and on understanding the genetic basis of evolution. The IBE is a center member of Barcelona Biomedical Research Park (PRBB).

Project description:

European Commission/ Horizon 2020 (2014+2020)

Duties:

The Comparative Genomics Lab (UPF) is seeking a highly organized lab manager who can work effectively, plan and organize the lab activities. Among others, the candidate will perform administrative duties such as organizing the daily activity of the lab, documenting procedures and preparing documentation for sample import and export (CITES). Furthermore, the lab manager will supervise the lab technicians, overseeing their experiments and will provide experimental support to ensure all projects are completed on time. It is also expected that the lab manager will provide new protocols and solutions to the current experiments

Candidate requisites

- Experience in running a general laboratory
- Excellent managerial skills
- Experience in general laboratory techniques (DNA/RNA extraction and QC, PCR, qPCR)
- Experience in cellular and molecular techniques
- Previous experience in preparation of libraries for Next Generation Sequencing will be highly valued
- Capacity to work independently and as part of a team
- Excellent communication skills in English

What do we offer?

30 K gross salary

Application process

Deadline to submit applications: 21 setembre 2022
