

In compliment of the article 17.2 of the 31/1995 of Spanish prevention of labor risks Law, The IBE delivers to the worker:

- **IBE espases Risk evaluation** (CMIMA building)
- **General CMIMA building risk evaluation (common zones)**
- **Autoprotection Plan (CMIMA Building)**
- **Emergency Plan (CMIMA Building)**

The referred information is available through IBE intranet <https://www.ibe.upf-csic.es/>

Furthermore, in each laboratory you can find a copy paper of concrete risks of the room.

The IBE also delivers to the worker the following **material for individual protection (EPI)** that, according to risk evaluation is indicated for the work that he/she will have to perform at his/her research laboratory at IBE:

Protection material	Company	Units
<ul style="list-style-type: none"> • Laboratory labcoat: 		1
<ul style="list-style-type: none"> • Protection glasses: 	Uvex (VWR international; 89/686/EEC and standard EN 166 (1995)	1
<ul style="list-style-type: none"> • Other: 		0

The worker has been informed on when/where to use perceptively that material and how to use it.

On his/her side, in compliment of article 29 of the cited Law, the worker takes compromise to:

- Use the equipment in the indicated situations and always in areas where it's use is compulsory
- Use and maintain them following manufacturer's instructions
- Consult any doubt on its use
- Inform immediately on any defect o damage on the equipment
