

IBE publishes an internal monthly newsletter for the community. The newsletter has a section to welcome new IBE members.

If you wish, you can introduce yourself sending a small text paragraph as a presentation (max 60 words) and an informal picture

Here you can find some examples:

We want to **welcome** ...

Klara Eleftheriadi

PhD Student

Metazoa Phylogenomics Lab

Hola todos! My name is Klara and I am from Greece. I have a Bachelor's degree in Computer Science and Biomedical Informatics from the University of Thessaly in Greece and a Master's degree in Bioinformatics from the University of Crete, also in Greece. During my master thesis I dived into the genomics world, studying marine vertebrates.

I switched into the realm of invertebrates and joined IBE as a PhD student in Metazoa Phylogenomics Lab, under the supervision of Rosa Fernández.

In my free time, I really enjoy exercising, bicycling and walking on the beach. Furthermore, I love cooking and spending time with family and friends.

Happy to meet you all!!!

Maria Estarellas

Master Student

Evolutionary Population Genetics, Systematics, Biogeography and Evolution of Reptiles and Amphibians and Microbial Ecology and Evolution lab

Hello again! I'm returning to IBE to do my Master's thesis with Elena Bosch, Javier del Campo and Salvador Carranza. After finishing Human Biology at UPF I enrolled in the MSc in Terrestrial Ecology and Biodiversity Management (Specialization in Management and Diversity of Flora and Fauna) at UAB.

During my stay at IBE, I will be working on a project funded by the Planetary Wellbeing initiative of the UPF investigating the Emergent Infectious Diseases that are threatening amphibian populations worldwide.

In my free time I love going hiking, scuba diving, horse riding and basically doing any outdoor activity. But I also enjoy reading a good book or playing the guitar.
